

ULTRA-LOC®

IT'S A MIRACLE!

**It's mesh...it's solid...it's ULTRA-LOC,
a whole new breed of safety cover!**

You no longer have to choose between the light weight of mesh and the light-blocking benefits of a solid cover. ULTRA-LOC – the revolutionary new type of safety cover exclusively from LOOP-LOC – gives you the best of both worlds!

So revolutionary, it's patented!

Utilizing a patented process, ULTRA-LOC's advanced material is fabricated by adding a proprietary solid copolymer coating to LOOP-LOC's famous lightweight but incredibly strong mesh.

Available with or without "invisible" mesh drainage panels. Cover without drainage panels blocks 100% of sunlight and is sold with automatic pump, which must be used at all times to meet ASTM safety cover standards.

BLOCKS 100% of sunlight.

33% LIGHTER in weight than typical solid vinyl cover material, yet ultra-durable!

FASTER DRAINING - ULTRA-LOC's patented material "bounces back," so water quickly finds optional mesh drainage panels!

NO MORE UGLY "POCKETS" that form when water and debris cause solid vinyl covers to permanently stretch out of shape.

12-YEAR PRO-RATED WARRANTY!
